

Types 100 109

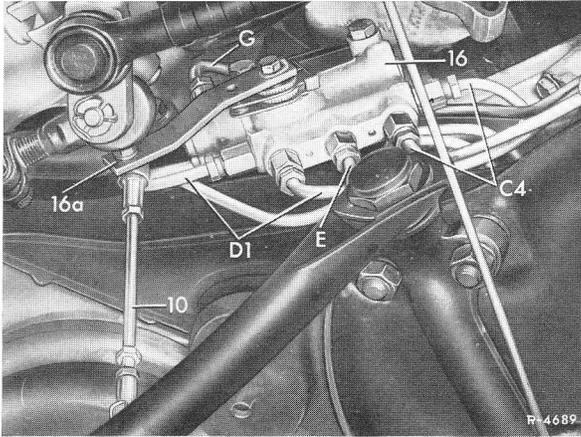

Every 45 000 km / 30 000 miles

Vehicles up to March 1971 only

Not required for vehicles as from April 1971 with maintenance-free ball joints

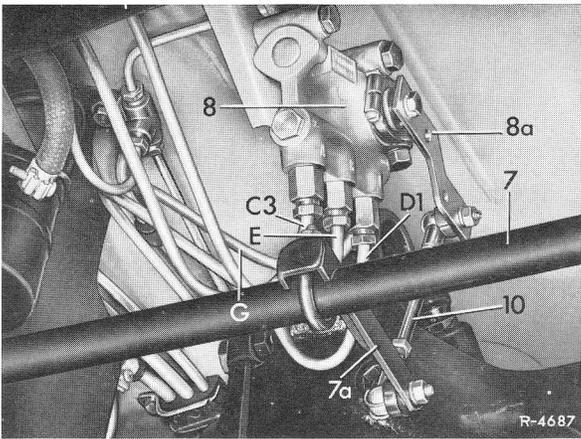

Grease

Long-term grease
see: Operative Materials Page 266.2

Level control valve on front axle

- 10 Linkage
- 15 Left level control valve
- 16a Lever

Level control valve on rear axle

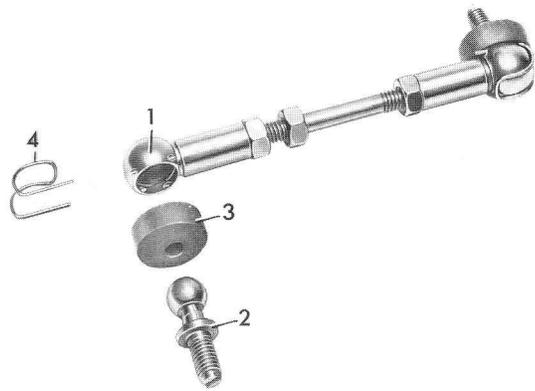

- 7a Torsion bar lever
- 8 Level control valve
- 8a Lever
- 10 Linkage for level control valve

- After taking off locking wire remove linkages on level control valves of front and rear axles.
- Clean ball sockets and ball pins and check for wear.
- Check sealing washers and renew if necessary.

- Grease ball sockets, assemble and secure.

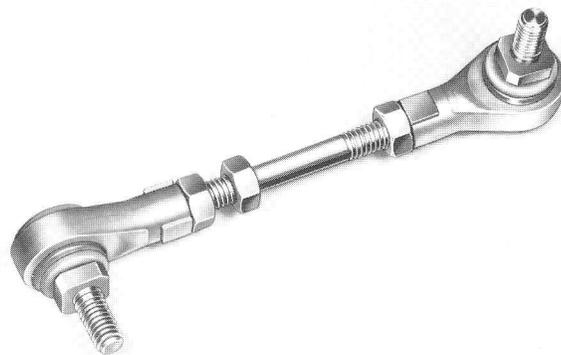

Note: If worn ball joints have to be renewed, then the level of the vehicle must be readjusted.

Do not pull ball pin out of ball socket of maintenance-free ball joints

Former version

- 1 Ball socket
- 2 Ball pins
- 3 Sealing washer
- 4 Locking wire

Maintenance-free version
