

Car Care Preparations

Use only such preparations for the maintenance and care of our vehicles which comply with our requirements, such as compatibility with our paintwork, chromium-plated and rubber parts, easy application, etc.

The preparations listed in the following table comply with our requirements. They are checked continuously so that we can guarantee uniform quality all the time. Preparations for which a part number is shown in the list can only be obtained from our Sindelfingen spare parts department.

When using these preparations please observe the following:

- | | |
|--|--|
| 1. Chromium-plated and anodized parts: | MB chrome care should be used for regular care only; for cleaning and preservation use the other preparations listed under item 1. |
| 2. Paintwork: | MB polishing compound is intended for workshop use only since it requires expert handling. |
| 3. Fabric, leather and leatherette care: | Use only the preparations listed. Under no circumstances may solvents, such as nitro thinner or similar substances be used. |
-
