

Every 15 000 km (10 000 miles)

Model year 1974 **Engine M 117** California Emission Control System **USA-version**

- Remove air filter.
- Soak a rag with cleaning fluid.
- Clean deposits on inside of throttle valve housing. Any sticking deposits should be removed with a non-metallic scraper (for instance wood).
- Blow out vacuum connections on throttle valve housing with compressed air.

Make sure throttle valve moves freely.
