

General

The horizontally arranged headlight unit includes the following:

High beam in all sealed beam lights and low beam in the outer sealed beam lights.

The turn signal light, and the parking light are installed in a separate unit underneath the bumper. The side marker lights are installed in the side portion of the main headlight unit.

The arrangement of the lights in the tail light assembly is as follows (see Fig. 2):

The Halogen fog lamps are located separately under the bumper.
